

# Abstract Writing Tips

- *Understanding of the Problem*
- *Most Challenging aspect of the problem*
- *Reason for Choosing this problem*

## TIP

Be articulate and explain your understanding. Each team could look at addressing a different element of the problem.

What aspect of the problem you are going to address ?

# Abstract Writing Tips

- *Understanding of the Problem (Example)*

*Normally in our area we see garbage thrown around especially in rural areas. In urban area, garbage-bin is full due to failure of Municipal Authorities to clean the garbage on timely basis, which causes health problems and many diseases. Waiting in Queues can be distressing and can raise tempers. These are the factors which affect waiting time in queue.*

## Example :DONTs

- *Most Challenging Aspect (Example)*

The most challenging part of the problem is the mindset of people. They should have similar feeling towards their surrounding locality as they have regarding their own house with respect to cleanliness. Municipal Authorities are not performing their work properly. Every citizen should realize their individual rights toward societies and also make the authorities of their locality realise their responsibility only after which the particular area can develop.

## Example :DONTs

- *Reason for Choosing Problem (Example)*

The reason for choosing this problem is to make people aware their need to keep their locality clean and make the Municipal Authorities to discharge their duties firmly and responsibly. The survival becomes difficult for the people as their surrounding is not clean and travelling on roads is also difficult.

# Abstract Writing Tips

- *Approach*
- *Platform/Coding Language/Framework*
- *External Tools*
- *Fortnightly targets*

## TIP

Use Simple Diagrams.

Add Details

Give your timelines a thought. Factor in exam breaks.

# Abstract Writing Tips

Microsoft Word  
Document

- *Previous Projects Undertaken*
- *Team Strengths*
- *Team Achievements*
- *Personal Motivations*

## TIP

Previous Projects could be curricular or other hackathons / pet tech projects  
Technical expertise / achievements might be of individuals and not as this team together

Do share what you are looking forward to learn

## Example : DON'T's

Microsoft Word  
Document

- *We have not done any big project we are ### student so we have just done our final year project which we have written above by doing this project we would like to prove our self.*

Instead of marginalizing your own work, highlight what you have done.  
We understand all teams will not be very experienced!!!!

Document

## General TIPS

- Think, research, work on your idea/ abstract.
- Do not make it a hasty last minute job, it shows
- DO NOT copy paste from internet. If you are planning to use a paper etc refer it.
- Early Field work might be productive to give ideas for some problems. Mention it if you do with pictures.
- Highest Weightage to understanding of problem and depth of approach, but other responses matter.

# Thank You
